Office Action Summary	Application No. 10/524,710	Applicant(s) MANABE, KATSUNORI	
	Examiner Stephen F. Gerrity	Art Unit 3721	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6 July 2007 has been entered.

Drawings

2. Figure 5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by applicant's admitted prior art.

At pages 1 and 2 of the written description under the heading BACKGROUND ART and in figure 5 of the present application applicant admits that a driver structure is old and well known which has the same structural features as those set forth in claims 1, 3 and 4. In particular, the admitted prior art discloses a driver structure comprising a blade edge (20) disposed to be in contact with a staple; a first pair of projections (21), each projection (21) of the first pair being provided at an opposite end portion of the blade edge (as seen in fig. 5); and a second pair of projections (25), each projection (25) of the second pair being provided on the blade edge (20) in vicinity of one the projections (21) of the first pair and each projection (25) of the second pair has a corner portion, and each projection (21) of the first pair has a guiding surface.

The structural limitations of the claim are met by the admitted prior art, and the recitations "and being disposed to be in contact with a corner formed between the crown and one of the leg portions for pressing the leg portion perpendicularly when the leg portion passes through the bundle of papers", "and being configured to be in contact with the crown in vicinity of one of the leg portions when the leg portion passes through the bundle of papers", "disposed adjacent to one of the corners of the staple, which engages with the crown and is configured to prevent the corner of the staple from slipping toward a central side of the crown", and "positioned at least partially outside of an outside edge of one of the leg portions, so as to guide said outside edge of the leg portion and restrict the broadening of a leading end of the leg portion when the leg

portion of the staple through the bundle of papers" are functional and intended use statements which are fully capable of being performed by the admitted prior art structure shown in fig. 5 and described at pages 1 and 2 of the present application.

Regarding claim 3, the admitted prior art discloses a middle projection (above 24 in fig. 5) provided on the blade edge between the projections (25) of the second pair, and which is fully capable of performing the function of "to hold the crown of the staple when the pair of leg portions pass through the bundle of papers".

Regarding claim 4, the admitted prior art discloses the middle projection (above 24 in fig. 5) comprises a crown pressing portion which is fully capable of performing the function of "to press the crown".
